

CLASS II and CLASS III CORRECTION WITH SLX BRACKETS AND MOTION APPLIANCE

9th and 10th September 2016 - Thermae Palace Ostend

Dr. Luis Carrière will show you how correcting the Class II or Class III malocclusion at the beginning of treatment, when patient compliance levels are at their highest, provides unique efficiencies and with minimal extractions. Harmonious forces are created with the use of the Carriere Motion Appliance and the New Carriere SLX Bracket System together, allowing Dr. Carrière to achieve both occlusal and soft tissue results which ensures long-term stability and optimal aesthetics.

IN THIS SEMINAR, YOU WILL LEARN HOW TO:

- Understand the efficiencies of the Carriere Orthodontic Philosophy for the patient's benefit and provide stable treatment results.
- Soft tissue analysis as patients age
- Efficiencies of combining the Carriere Motion and SLX Systems

Dr. Carrière obtained his dental degree from the University of Complutense in Madrid, in 1991. He then attended the University of Barcelona where he completed his Orthodontic training and received his Master of Science in Orthodontics in 1994. In 2006, he received his Doctorate in Orthodontics, Cum Laude, from the University of Barcelona.

Dr. Carrière was the Winner of the "Joseph E. Johnson Award" and the International Design Award Delta Gold ADI FAD 2009 for the "Carriere Distalizer MB". Dr. Carrière is also a Member of the Editorial Review Board for the American Journal of Orthodontics and Dentofacial Orthopedics.

As an invited professor of several Orthodontic departments throughout the world, Dr. Carrière lectures internationally when he is not treating patients in his private practice in Barcelona, Spain.
